

# WATER TREATMENT PROGRAM

## Comprehensive Water Treatment Program for Steam or Hot Water Boilers

Whether you heat your building with oil or gas, with a steam boiler or a hot water boiler, you and your tenants both will benefit from United Metro Energy's Water Treatment Program.

Our comprehensive program is designed to:

- Reduce corrosion
- Keep heat transfer surfaces clean
- Ensure optimal heat transfer
- Maximize boiler efficiency
- Extend the life of your boiler
- Significantly reduce energy costs, year after year
- Provide a return on investment in as little as three months, and repeatedly each month thereafter

United Metro Energy also provides **FREE training for superintendents**, so you can take full

advantage of the Water Treatment Program without

making repeated service calls. Plus, we offer a **FREE engineering survey** of your boiler and comprehensive reporting to notify you of any issues that may affect your boiler's protection.

With these value-added services and built-in savings, the choice is clear: United Metro Energy's Water Treatment Program should be included in any building's energy plans.

Call United Metro Energy TODAY to schedule a free engineering survey of your boiler.

# PRODUCTS AND SERVICES

## Products

- **BIOHEAT® FUEL:** The greener, cleaner fuel is better for the environment, improves efficiency and lowers operating costs. It requires no modifications to your current oil-fired heating system. It can save you money with the New York State Clean Heating Fuel Tax Credit. New York City requires that all heating oil used within the five boroughs is blended with at least 2 percent biodiesel (a B2 Bioheat® fuel blend).
- **HEATING OIL:** United Metro Energy supplies No. 2, No. 4 and No. 6 heating oil to individual homes, mid-to-large size apartment buildings, factories and industrial production facilities.
- **NATURAL GAS:** United Metro Energy is an ESCO (Energy Service Company). United Metro Energy provides natural gas at lower prices than the local utility, helping to lower the energy costs of heating, ventilation, air conditioning, cooking or gas fired equipment.
- **ULTRA-LOW SULFUR DIESEL (ULSD):** ULSD is a New York State mandated environmentally friendly heating fuel that lowers energy costs through longer equipment life, higher boiler efficiency, greater fuel consistency, and reduced maintenance and cleanings.

## Services

- **EQUIPMENT INSTALLATIONS:** We install hot water heaters, boilers, warm air furnaces, retention-head burners, oil tanks, natural gas pipes, and central air conditioners. We install automated energy tracking systems to monitor building energy usage.
- **TESTING & CLEANING OF TANKS:** United Metro Energy can clean and test your existing tank to maximize efficiency. This process will also ensure a smooth transition to Bioheat® fuel and/or natural gas. United Metro Energy knows what it takes to make your system run flawlessly.
- **CONVERSIONS:** You can go from heating oil to natural gas; transition from heating oil to Bioheat® fuel; switch heating oil grades from #6 to #4 to #2; or set up a dual-fuel system using both natural gas and heating oil/Bioheat® fuel – all with the help of United Metro Energy's certified, insured and experienced team.
- **GENERAL MAINTENANCE & REPAIRS:** All heating systems require maintenance and repairs; United Metro Energy offers full service and maintenance for your heating equipment, as well as service 24 hours a day, every day of the year.
- **ANNUAL TUNE-UPS:** United Metro Energy performs annual tune-ups with the most advanced equipment available ... providing you with everything your equipment needs and requires.
- **WATER TREATMENT:** Our comprehensive Water Treatment Program is designed to extend the life of your boiler and maximize its efficiency. Free training for building superintendents and a free engineering survey are also included.
